

Muhammad Shaheer Luqman

Driven Software & Applied AI Engineer building production-grade AI systems and end-to-end solutions for real-world industrial problems. Strong in problem-solving, system design, computer vision, NLP, and full-stack development.

Experience

Applied Research Engineer (Full-Time) — Retrocausal

Jun 2025 – Present

Full-Time • US-based (Remote)

Building production-grade AI systems and end-to-end solutions for industrial use cases, contributing to in-house frontend/backend software, and researching Robot Manipulation and Vision-Language-Action systems.

- ▶ Delivered a complete AI-powered solution for **BMW** — designed and implemented frontend, backend, and AI components across the full lifecycle.
- ▶ Worked on in-house software for both frontend and backend, supporting a range of development tasks.
- ▶ Supported deployments using various **AWS** products and **RunPod** infrastructure.
- ▶ Conducted research on unsupervised action segmentation and temporal long-video understanding.

Python PyTorch Computer Vision VLMs Full-Stack Vue.js Django AWS RunPod

Management Trainee Officer (MTO) — Confinality

Jul 2025 – Oct 2025

Contract • Remote

Completed the MTO program while contributing to NLP and speech-focused AI workflows in production.

- ▶ Selected in a highly competitive MTO cohort.
- ▶ Built and supported NLP tasks including sentiment analysis, speech detection, and transcription pipelines.
- ▶ Worked on voice generation systems and AI calling agent creation.

NLP Voice Generation Sentiment Analysis Speech Detection Transcription AI Calling Agents

Applied Research Engineer (Intern) — Retrocausal

Mar 2024 – Jun 2024

Internship • US-based (Remote)

Contributed to industrial-scale AI systems across computer vision, NLP, and LLM workflows.

- ▶ Built an end-to-end video activity recognition pipeline using **Body Pose Estimation** + **Vision-Language Models**, translating visual and textual data into PMTS codes for industrial process optimization.
- ▶ Developed **LLM-based prompt engineering** systems with automated Excel report generation and visual analytics.

Python Django Computer Vision LLMs Backend MediaPipe Excel Automation

Education

BS Computer Science — FAST NUCES

Sep 2021 – Aug 2025

CGPA: 3.90 / 4.00

- ▶ Summa Cum Laude Honors.
- ▶ Rector's List (4.0 GPA) — 4 semesters.
- ▶ Dean's List (3.5+ GPA) — 4 semesters.

A Levels — Generation's School

Grades: A*, 2A

Research & Publications

Unsupervised Skeleton-Based Action Segmentation via Hierarchical Spatiotemporal Vector Quantization

2026

[arXiv:2604.15196](https://arxiv.org/abs/2604.15196)

A hierarchical spatiotemporal vector quantization framework for unsupervised skeleton-based temporal action segmentation, achieving SOTA on the HuGaDB, LARa, and BABEL benchmarks. [View on arXiv](#)

Ensuring Child Safety: An IoT-Based Surveillance System for Remote Monitoring and Detection of

2024

Anomalous Behavior

[ICETST 2024 • IEEE Xplore](#)

Proposed an intelligent IoT-based system for remote child monitoring, combining hardware sensors, software components, and AI-driven anomaly detection to deliver real-time safety alerts. [View on IEEE Xplore](#)

Research Interests: Robotics, Computer Vision, Temporal Video Understanding, Vector Quantization, IoT + AI Systems, Vision-Language Models.

Projects

PixelForge — Digital Marketing Tool Using GenAI

Final Year Project ([GitHub](#))

A generative AI platform for marketing content (images/video), built for real-world workflows.

- Built a full-stack system using **React + Flask**, integrating **Stable Diffusion** for AI image generation.
- Developed pipelines for automated ad content generation (image/video).

Crypto Trading Simulator

Personal ([GitHub](#))

- Built a simulated crypto-trading platform on the **MERN** stack with real-time market-data APIs.
- Designed an intuitive UI using Ant Design and implemented database-backed simulation logic.

LushWear-IMS — Inventory Management System

Personal ([GitHub](#))

- Built backend APIs in **FastAPI** for products, search, and stock movement.
- Developed a desktop **Electron** frontend with a modern dark UI, integrating **Supabase** for persistence.

Fashion Industry Recommender System

Personal ([GitHub](#))

- A CNN-powered recommender using deep-learning visual embeddings to generate personalized item suggestions.
- Created a Python app interface to surface tailored product suggestions.

Phishing Detection Web App

Personal ([GitHub](#))

- Developed a Python phishing-classification workflow with a web-facing interface for quick URL/content checks.

Contacts Organizer

Personal ([GitHub](#))

- A C++ contact manager with CRUD, search/sorting, and CSV-based persistence with backup handling.

Skills

AI / Machine Learning PyTorch, Scikit-learn, Hugging Face; Computer Vision (YOLO, MediaPipe); Diffusion Models (Stable Diffusion); NLP (BERT, Whisper, ILLabs); LLM Prompt Engineering.

Software Engineering Backend (Django, Flask, FastAPI, Express.js); Frontend (React, Next.js, Vue); REST APIs, GraphQL; Postman; Databases (MySQL, MongoDB, Oracle SQL, PostgreSQL); Cloud (AWS, RunPod); System Design.

Systems & Tools Selenium (Web Automation), Arduino Programming, Assembly Language, IoT Systems, Git & Version Control, Linux, Docker.

Programming Languages Python, C / C++, JavaScript.

Honors & Awards

- **Gold Medal** — ICPC National Competitive Programming (Nov 2024)
- **Summa Cum Laude** — Graduated with a high GPA (3.90 / 4.00), FAST NUCES (2025)
- **Bronze Medal** — ICPC National Competitive Programming (Feb 2024)
- **Winner** — Code Sprint, PROCOM 2023 (2023)
- **Best Team Award** — Coder's Cup, ACM FAST
- **Rector's List (4.0 GPA)** — FAST NUCES, 4 semesters • **Dean's List (3.5+ GPA)** — FAST NUCES, 4 semesters

Leadership & Volunteer Experience

- **Director Technical Affairs** — Developers Day'25
- **Technical Lead** — ACM NUCES
- **CS Competition Head** — Developers Day'24
- **CS Competition Co-Head** — PROCOM'24
- **Training & Mentorship Head** — ACM NUCES
